

# on the other side

dall'album del gen verde on the other side

We look from distant shores  
To the other side  
Baffled by worlds unknown  
That the others hide  
Different by race and creed  
Leading separate lives  
If we don't heal the wounds  
How can we survive?

What if I put myself  
On the other side?  
What if I take your pain  
And I make it mine?  
I know I can't hurt you  
Without hurting myself  
In everything I do  
I will sing

No one is a stranger to me  
No one is a stranger to me  
I see my own face reflected in you  
What I wish for myself is my wish for you too  
And I'll find myself when I  
Walk in your shoes

On the other side, on the other side  
Oh, oh...  
On the other side

If we walk side by side  
We will carry on  
Where there's a bridge to build  
Is where we belong  
Where there's a stumbling block  
We shall move beyond  
Till the whole world will join  
In this song:

No one is a stranger to me...

All your joys  
Are mine too      On the other side  
All your pain      On the other side  
Is mine too      On the other side  
All you need      On the other side  
I need too      On the other side  
All you dream  
I dream too      On the other side

And I'll walk until I find  
All the world is mine

No one is a stranger to me...

*Today the world is more than  
ever a global village, yet our  
differences can be a source of deep  
division and fear, driving us further  
apart.*

*But if we were to change our  
perspective, we could discover  
diversity as a gift.*
